

A Special Glow For The Holiday Season

Facial Rejuvenation Acupuncture

Facial Rejuvenation Acupuncture also known as an Acupuncture Facelift, is a non-surgical method of reducing the signs of aging while simultaneously revitalizing the whole body. Not only will you look younger, you will also feel reenergized.

Founded on the principles of Oriental Medicine, Facial Acupuncture offers a more holistic approach to achieving natural beauty.

Does it really make a difference?

Yes! The *International Journal of Clinical Acupuncture* reported that among 300 people who received facial acupuncture, 90% saw visible results after one treatment. Our experience suggests similar results with patients reporting improvement in the appearance of wrinkles, complexion and overall rejuvenation.

Alternative to a surgical face-lift?

Facial Rejuvenation Acupuncture is an excellent alternative to cosmetic surgery. It is far less costly and safe, virtually painless, has no side effects or risk of disfigurement. While Facial Acupuncture is not a replacement for surgery if one is trying to reshape a nose or chin, it will take years off of your face safely
